

# Understanding How and Where Care Can Be Provided

## Home Health Care

- Care received in the home.
- Additional care usually provided by family and friends.
- Personal Care or Skilled Care may be provided by professionals which might include; Home Health Aides, Homemakers, Chore Aides, Therapists, Nurses and Personal Care Attendants.

## Community Care

- Supports the ability to stay at home.
- Adult Day Care.
- Temporary overnight care may be provided at times to provide relief for family that may be caring for a loved one.

## Assisted Care Facility

- Community or Apartment-Style Environment.
- Round the clock personal and custodial care is available for those in need.
- A good example of the most preferred future solution for Long Term Care.

## Nursing Home Care

- Round the clock custodial care nursing services.
- An institutional or hospital-like setting.
- Skilled Nursing and Therapy provided

## A Long-Term Care Plan May Be Accessed When A Person Is Unable to Perform 2 Out Of 6 of These Activities of Daily Living
